Education

Matric **2018**

certifications

- SheCodes Front-End Development Bootcamp. **2024**
- ALX AI course **2024**

Technical Skills:

- **AI & Data Analysis:** AI tools, machine learning fundamentals, data visualization
- **HTML:** Proficient in semantic HTML5, including the use of ARIA attributes to enhance accessibility.
- **Web Performance Optimization:** Experience in optimizing web page performance, including load times and rendering speed.
- **CSS:** Skilled in modern CSS techniques such as Flexbox and Grid, with experience in preprocessors like Sass or Less. Adept at implementing responsive design principles to ensure seamless user experiences across various devices and screen sizes.
- **JavaScript:** Solid understanding of JavaScript, including DOM manipulation and event handling. Familiarity with modern JavaScript frameworks or libraries such as React, Angular, or Vue is advantageous.
- **Responsive Design:** Ability to develop animated, responsive landing pages that adapt seamlessly across different devices and screen sizes.
- **Cross-Browser and Cross-Device Testing:** Proficient in conducting testing to ensure compatibility across various browsers and devices.

Soft Skills:

- Problem-Solving
- Communication & Collaboration
- Adaptability & Eagerness to Learn
- Attention to Detail

Projects

Laptop Repair Booking Site **Link**

Developed a responsive and user-friendly website for booking laptop repair services using HTML, CSS3, and JavaScript.

Implemented a seamless booking system that sends requests directly to the team via email or WhatsApp, enhancing customer convenience.

Integrated a live chat feature to provide real-time customer support and assistance.

Ensured cross-browser compatibility and optimized the site for mobile devices, improving accessibility and user experience. Worked on front-end design and functionality to create a modern and visually appealing interface.

E-commerce perfume Website **Link**

Designed and developed a multi-page e-commerce website using React, focused on delivering a smooth and interactive shopping experience.

Built dynamic product listings, product detail pages, and a fully functional shopping cart with add and remove capabilities using React state management.

Implemented React Router for seamless navigation across multiple pages, enhancing the user experience.

Focused heavily on styling to create a visually appealing and responsive design, showcasing modern UI techniques and attention to detail.

Utilized CSS and component-based styling to create a clean, consistent look across the site.

Tested and optimized the site for usability, responsiveness, and performance across devices.

Beauty Oasis Website **Link**

Designed and developed an engaging and visually appealing website for Beauty Oasis Weaves, ensuring seamless navigation and user experience.

Utilized HTML, CSS, and JavaScript to create interactive and dynamic web pages, including product listings, shopping cart functionality, and contact forms.

Integrated Google Fonts and Font Awesome icons to enhance the website's aesthetics and functionality.

Implemented responsive design principles to ensure the website is accessible and visually appealing on various devices and screen sizes.

Conducted thorough testing and debugging to ensure the website's performance and functionality were optimized.

Managed content updates and maintenance tasks, ensuring the website remained current and relevant.

Nolulove's Cafe site. **[Link](#)**

Developed a responsive café website using HTML, CSS, and JavaScript, ensuring optimal viewing on various devices with media queries.

Integrated Google Fonts and Font Awesome icons for enhanced visual appeal and functionality.

Conducted thorough testing, managed content updates, and maintained site performance and usability.
